

SECURE CODE
WARRIOR

The fastest and easiest way to improve
your application security program.

Secure your code, from the start.

Secure Code Warrior adds a powerful layer of cyber protection that is simple, scalable and positive. Our platform and tools have been designed for developers to be fun, competitive and engaging.

Companies can scale secure coding excellence across their organization as individuals and teams easily build and verify their application security skills, gain real-time security advice and monitor skill development.

Whether undertaking hands-on training, competing in team or company-wide tournaments, being aided by a real-time coaching plug-in, or completing assessments, Secure Code Warrior's unique approach embeds security into the DNA of developers.

Secure Code Warrior helps developers to:

- Build their skills online with hands-on exercises
- Receive real-time advice through IDE coaching plug-in tools
- Verify their skillset through online assessments and certifications
- Monitor and measure their skill improvements and ROI

Achieve faster and more secure product development

The more your teams use the tools in our platform, the better they will become at coding securely and the less time and money you will spend fixing bugs.

- Embed security from the start, saving time, money and resources in the software development lifecycle
- Add a powerful and measurable layer of cyber protection for in-house or outsourced developers

Defend yourself with security-conscious developers

In a world that depends on software, developers need to be the first line of defense for any company's security strategy.

- Mitigate the secure developer skills shortage
- Equip your developers with training and tools to succeed

Build a positive security culture

Building a positive security culture reduces conflict between security and development teams and lets your developers focus their efforts on faster upgrades and creating competitive features.

- Train and equip developers to think and act with a security mindset
- Make learning about security fun, competitive and engaging

OUR PROVEN SUITE OF SECURE CODING TOOLS SIT WITHIN ONE POWERFUL PLATFORM, THAT MOVES THE FOCUS FROM REACTION TO PREVENTION.

TRAINING

- Self-paced, online, scalable learning
- Covers the OWASP Top 10 and other common security weaknesses
- Focus on specific, relevant security weaknesses
- Multiple languages and frameworks

LEARNING

- Video training resources for specific vulnerabilities
- Builds awareness and general knowledge

METRICS

- Know security maturity at a developer and team level
- Understand strengths and weaknesses
- Quantify success

COACHING PLUG-IN

- Real-time coaching plug-in
- Acts like a spell-checker for security while developers are coding
- Customized to company specific security guidelines
- Links back to training resources

TOURNAMENTS

- Makes it fun!
- Gets people involved
- Builds awareness
- Identifies security champions

ASSESSMENTS

- Customizable online assessments
- Verifies skills - identification and remediation
- External contractor quality assurance
- Baseline certification

WHAT OUR CUSTOMERS SAY

"It's the most awesome security training product I have ever come across."

Application Security Manager, Banking & Finance

"A lot of our developers find that they're using it for an extended period of time without even noticing."

Director - IT Applications and Systems Security, Telecommunications

"Secure Code Warrior has enabled us to train our developers in secure coding practices, across multiple languages. We also use it to assess external vendors determine the extent they will be allowed to code with us."

CISO, Technology

"We get good insight into how developers are tracking, including statistics on their strengths and weaknesses."

Information Security Specialist, Banking & Finance

ABOUT SECURE CODE WARRIOR

Secure Code Warrior is a global security company that makes software development better and more secure. Our vision is to empower developers to be the first line of defense in their organization by making security highly visible and providing them with the skills and tools to write secure code from the beginning. Our powerful platform moves the focus from reaction to prevention, training and equipping developers to think and act with a security mindset as they build and verify their skills, gain real-time advice and monitor skill development. Our customers include financial institutions, telecommunications providers and global technology companies in Europe, North America and Asia Pacific.
